Professor Joshua Lederberg
Stanford University
Palo Alto, California

Dear Prof. Lederberg:

I am chairman of NCRP committee #32 dealing with the problem of administered radioactivity for patient diagnostic procedures in Nuclear Medicine.

During the last meeting of our committee, it was brought to my attention that you had recently presented a paper dealing with the risk benefit concept with respect to radiation exposures normalized to a dollar and cents basis. I would greatly appreciate receiving a copy of the manuscript you delivered if one is available. This is an interesting approach and one which I would look forward very much to sharing with you.

I will appreciate whatever help you can provide to me.

With best personal regards.

Sincerely yours,

A. B. Brill, M.D.
Director, Division of Nuclear Medicine and Biophysics
